

EXHIBITION

## File 2024: Qubit Ai

Opening: 2 Jul 2024

2 Jul 2024 - 25 Aug 2024

Times and details

### FILE Festival

São Paulo  
São Paulo, Brazil

Location details

**QUBIT AI** delves into a unexplored territory presenting a selection of works of art resulting from the connection between artistic creation and technology, proposing a theoretical reflection on what the interrelationship between quantum computers and synthetic artificial intelligence will be.

#### About

Quantum computing, an emerging revolution in the technological field, offers a new range of creative possibilities for contemporary artists. This new era allows the exploration of unprecedented frontiers through a new computational format that consists mainly of quantum superposition and entanglement, a new field of exploration for computer science, as well as for the arts in general; on the other hand, artificial intelligence, fueled by synthetic data, offers artists a new way of making and understanding art, opening up space for new forms, concepts and artistic expressions.
